TECHNICAL SKILLS

Languages: Java, SQL, Typescript, Bash, SQL

Cloud & Databases: AWS IAM, EC2, S3, VPC, Lambda, DynamoDB, Supabase, PostgreSQL

Frameworks & Tools: React Native, React, Node.js, Express.js, Git, GitHub, Expo, Playwright, Vitest, React Test Library

Enterprise Tools & Platforms: Microsoft 365, Jira, Ivanti ITSM, Slack, Zoom

Identity & Access Management: Active Directory, Okta, SSO, MFA, User Provisioning, Access Control, Password Resets

Systems & Endpoint Management: Windows 10/11, macOS, Ubuntu Linux, Device Imaging, Device Provisioning, Endpoint Configuration, Microsoft 365 Installation and Support, PC Deployment.

Networking & Connectivity: VPN Configuration & Troubleshooting, DNS, DHCP, TCP/IP, Network Connectivity Issues

EXPERIENCE

Information Technology Support Specialist

University of Wisconsin - Parkside

Kenosha, WI

Dec 2024 – May 2026

- Diagnosed and resolved endpoint, VPN, and network configuration issues across Windows, macOS, and Ubuntu systems for 5,000+ users in an enterprise environment.
- Resolved 600+ incidents through Ivanti ITSM, identified recurring root causes, and helped reduce mean time to resolution by 20%, improving SLA performance and service reliability.
- Supported identity and access workflows in Okta and Active Directory, including user onboarding, MFA enforcement, SSO access, and account provisioning while reinforcing least-privilege access practices.

Operations Assistant

University of Wisconsin - Parkside

Kenosha, WI

May 2024 – Sep 2024

- Coordinated scheduling and task tracking across 100+ campus facilities, maintaining consistent service delivery and on-time completion for daily operations requests.
- Managed workload distribution for a 5-person team, streamlining task assignments to reduce scheduling conflicts and improve team throughput by 15%.

PROJECTS

MoneyMentor Mobile Finance App | React Native (Expo), TypeScript, Supabase, Node.js

[Github](#) 

- Built a cross-platform mobile finance application using React Native and Supabase, implementing transaction tracking, budgeting logic, and real-time dashboard updates
- Implemented secure authentication with Supabase Auth, including email/password login, Google OAuth, deep linking, persistent sessions, and token refresh handling.
- Implemented date-range filtering, financial data visualization, and responsive layouts to improve usability and user interaction flows.

Full-Stack Personal Expense Tracking Platform | React, Node.js, PostgreSQL, TypeScript

[Github](#) 

- Built a full-stack expense tracking platform with a React frontend and Node.js/Express backend to support budget management, expense logging, and spending trend analysis.
- Developed automated end-to-end testing with Playwright across multiple browsers, reducing regression defects by 30% and improving release stability.

BookEase - Serverless Booking Assistant | Python, AWS Lex, Lambda, DynamoDB

[Github](#) 

- Built a serverless hotel booking assistant using AWS Lex and Python-based AWS Lambda functions to process reservations, validate input, and manage multi-turn conversations.
- Designed DynamoDB schemas to store reservation data and session state, for fast lookups and reliable state recovery.

Cloud Identity & Access Management Project | AWS IAM, EC2, S3, VPC

May 2025

- Configured AWS IAM users, roles, and policies to enforce least-privilege access, including role-based permissions for EC2 and S3 and account-level password security policies.

EDUCATION

University of Wisconsin - Milwaukee

Master of Science in Computer Science (Incoming)

Fall 2026

University of Wisconsin - Parkside

Bachelor of Science in Computer Science

Jan 2024 - May 2026
